Menu Display

Health Elevate also offers personalized health insights based on the blood test results, giving users clear explanations of their findings.

01

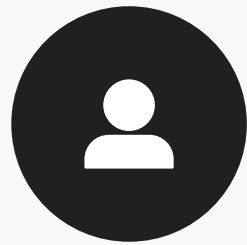

The Appointments section helps patients manage their health schedule by displaying upcoming appointments and allowing them to book new consultations or review appointment history.

02

Health Records offers a secure space to upload and access medical records, previous consultations, and lab results. For easy medication management, the Prescriptions section shows active prescriptions, provides medication reminders, and allows users to request refills from their doctors.

Application Service

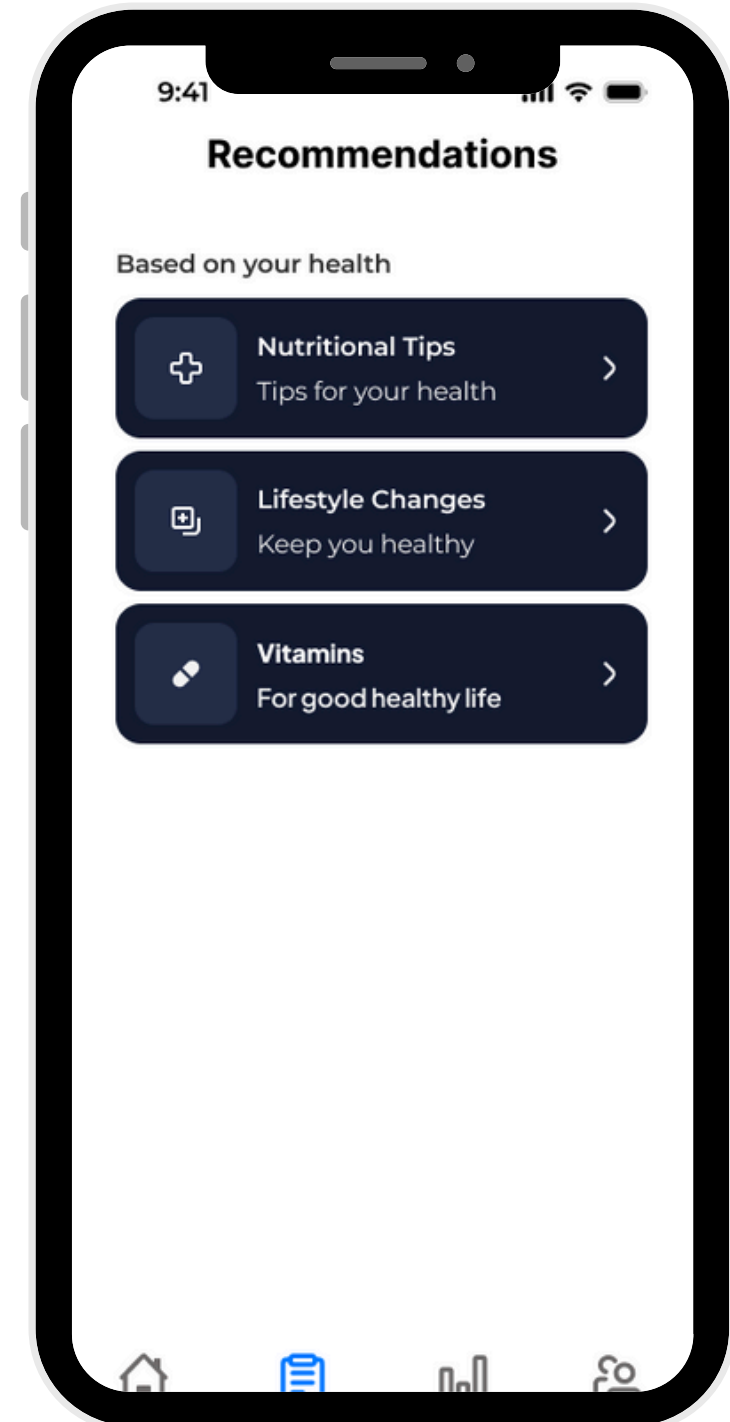

Appointment scheduling

is another critical service, enabling patients to book, reschedule, or cancel appointments directly from the app. The integrated calendar system syncs with the user's schedule, providing automated reminders to prevent missed consultations. Doctors can also issue e-prescriptions through the app, and patients receive digital copies for easy access and management of medications.

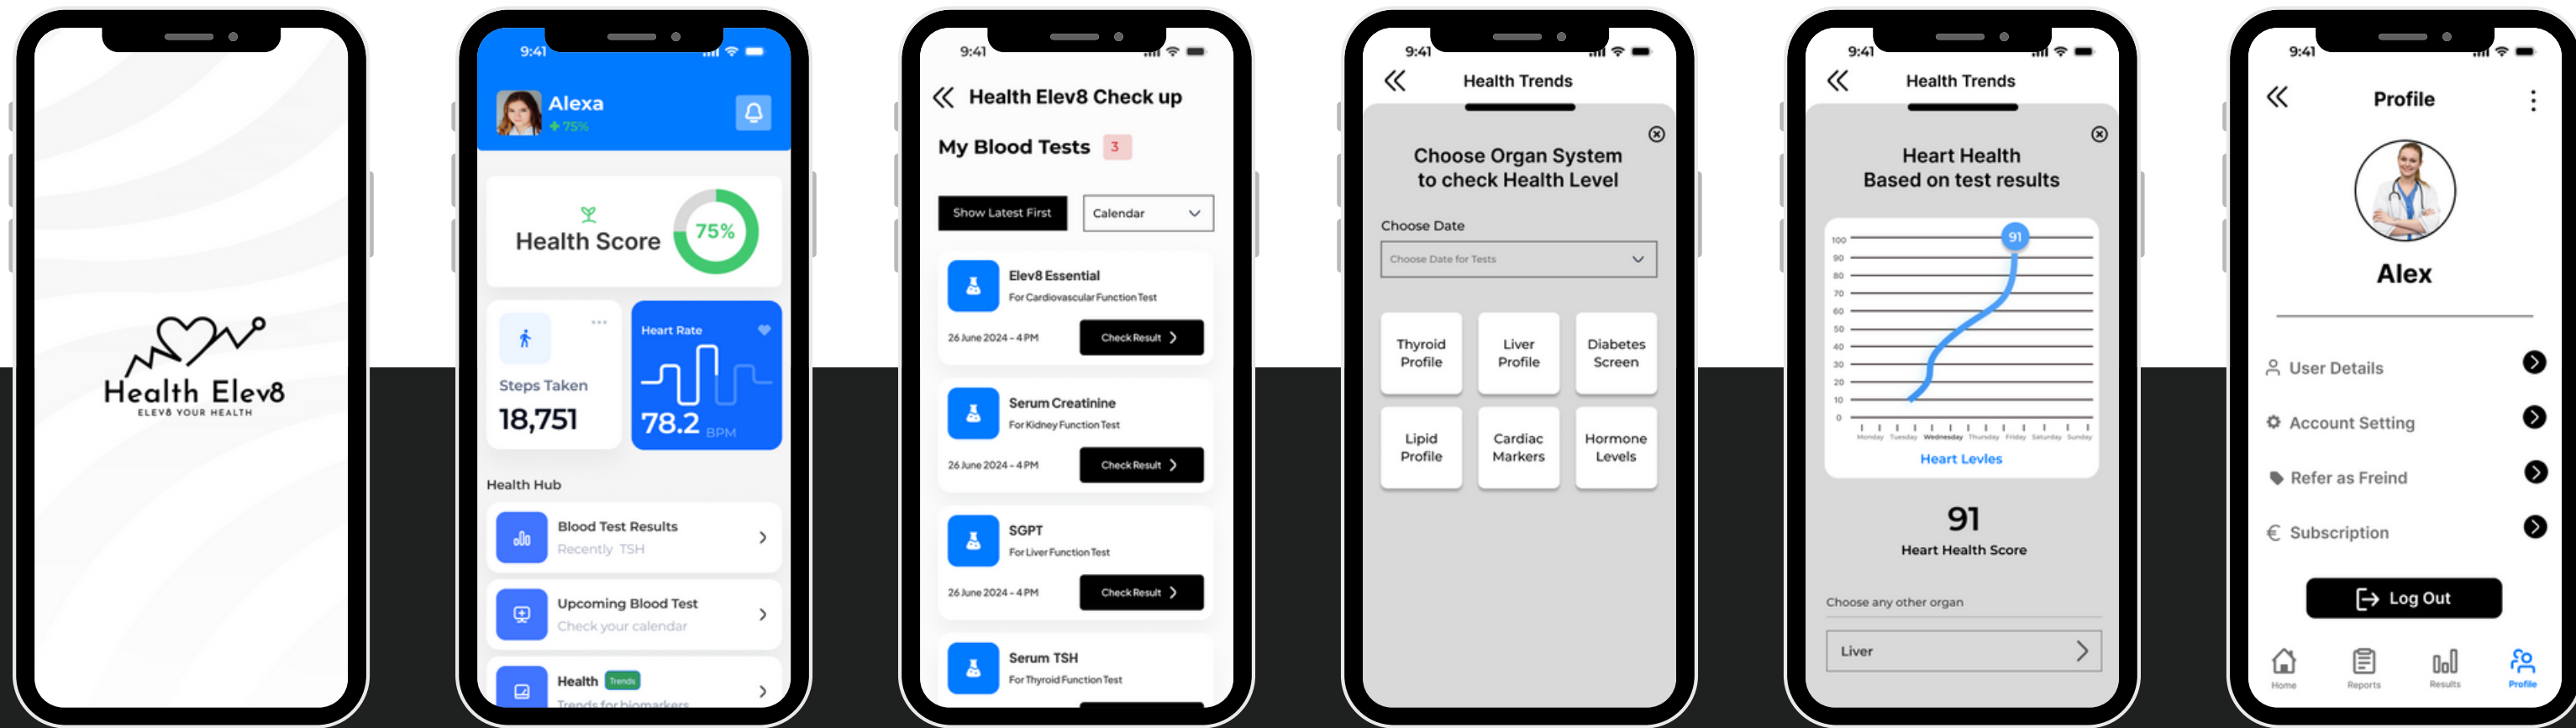

Health record management

is an essential feature, offering a secure, cloud-based system where patients can upload, access, and share their medical records with healthcare professionals.

Portfolio Section

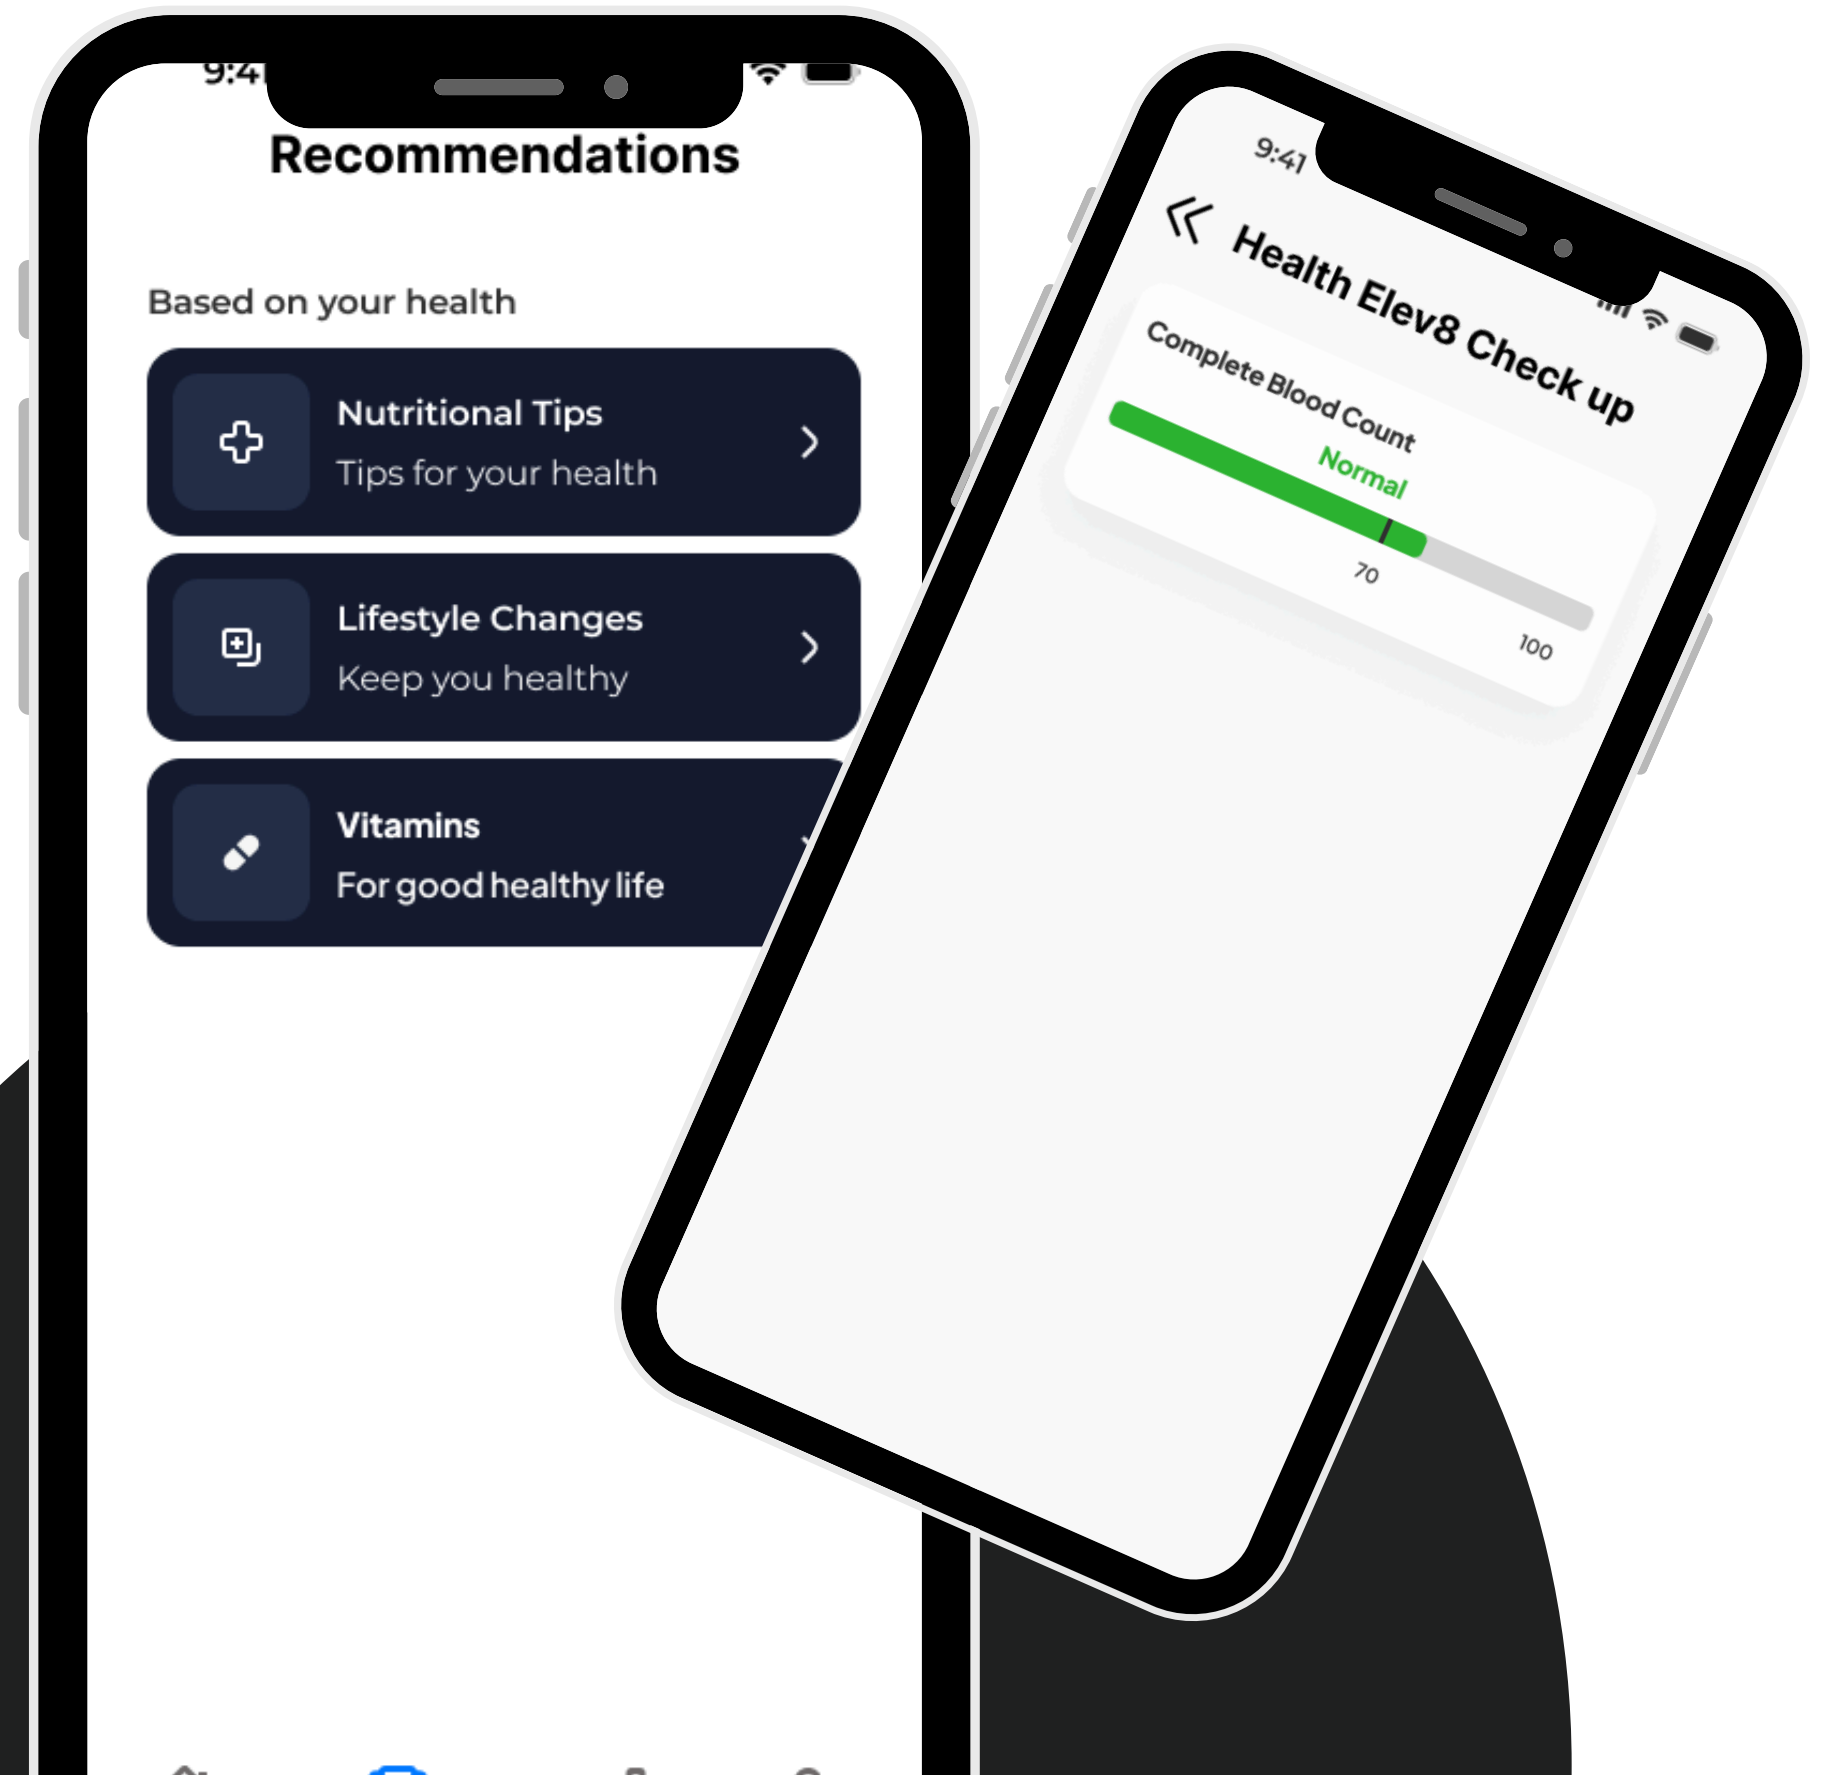

Health Elevate is designed to streamline the blood testing process, offering a range of services that make managing and scheduling tests simple and efficient for users. The app allows patients to book blood tests with ease, whether at home, in a lab, or at a nearby clinic. It includes an integrated appointment scheduling system where users can select their preferred testing locations and dates, with automated reminders to ensure they never miss a test.

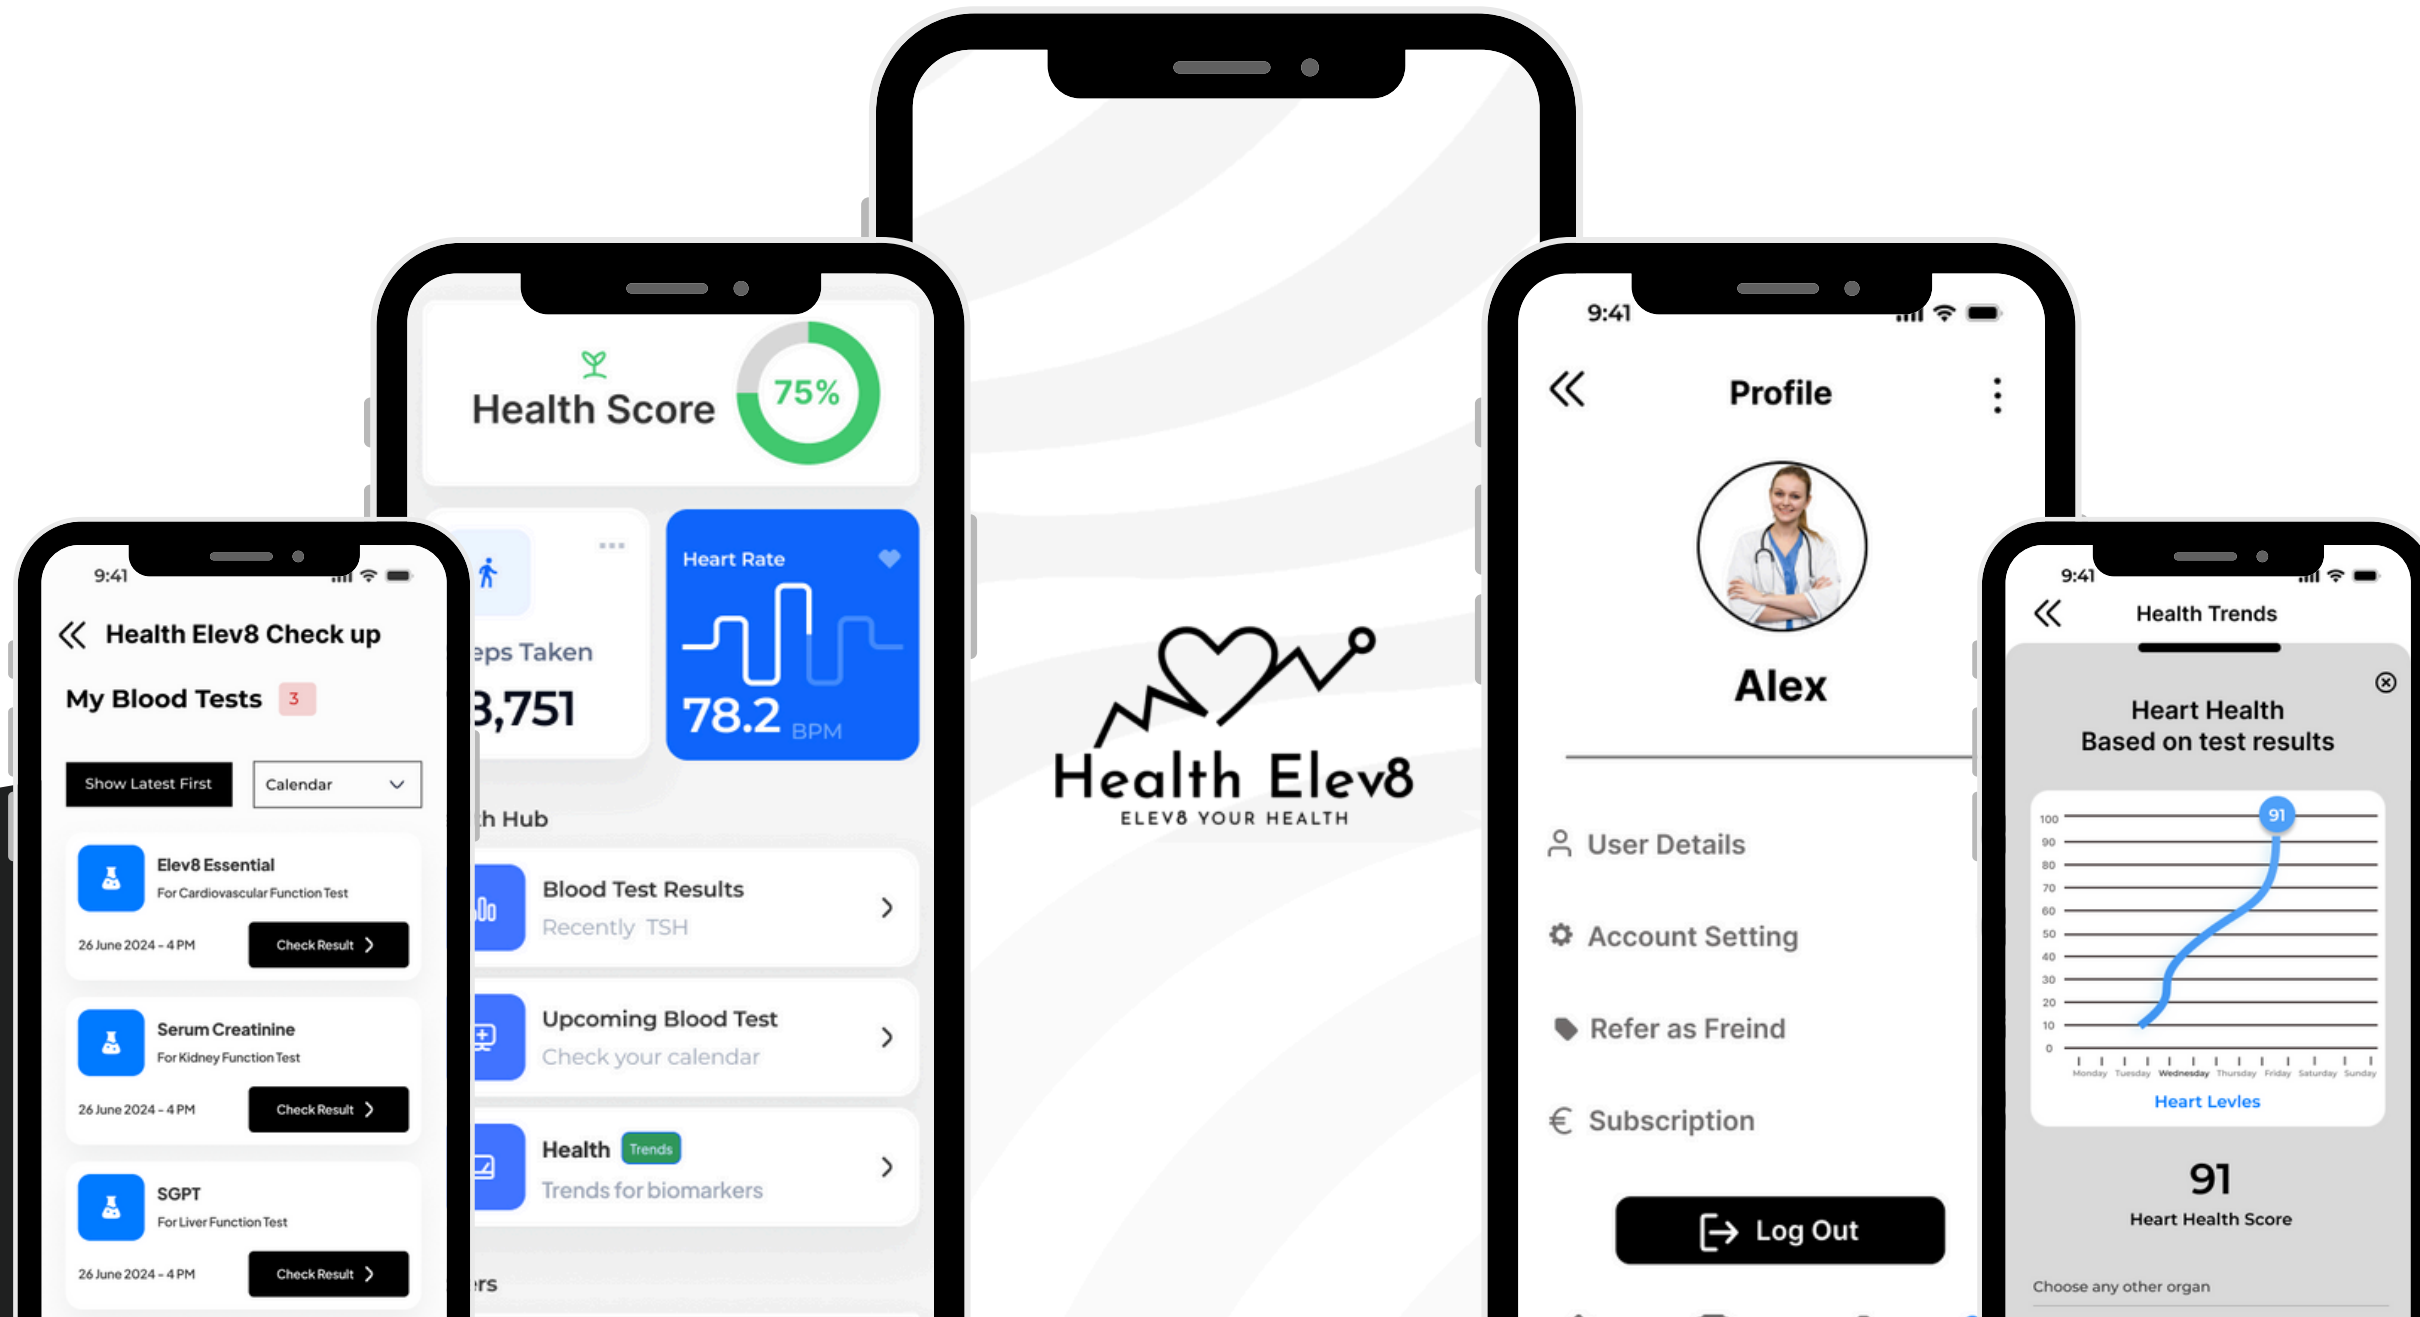

Application Service

Health Elevate offers a comprehensive range of services designed to streamline the blood testing process for users. With the ability to easily schedule blood tests at home, in labs, or at nearby clinics, the app ensures convenience through a user-friendly booking system. Patients can opt for home sample collection, allowing trained technicians to come to their location for blood draws. The app features a built-in appointment scheduling tool that sends automated reminders for upcoming tests, helping users stay organized and avoid missed appointments.
